

## G-Touch® 4K Emerald Range

### Features & Benefits

We are happy to announce our new G-Touch® Emerald. Our continued innovation has helped us develop an interactive touch screen with outstanding image quality.

Now with the highest brightness of any G-Touch® screen and now features the latest optical bonded technology which allows the G-Touch® displays to have wide viewing angles with next to no glare.

User interface is one of the most important factors when developing digital touch technology. Developing a 3-touch rule allows users to access any function within 3 touches, ensuring an intuitive and easy way to use our G-Touch® screens. The G-Touch® Emerald also features a USB Type C, 20W front facing speakers and strong and durable glass which future proofs your investment!

#### ▶ New Ports and Accessibility

**Public USB** – On screen USB ports work for the active source, no matter what it is.

**HDMI CEC** – Compatible devices to control screen functions like power and volume. E.g. a soundbar.
