## Unbound Your Potential

The Genee Vision range quickly became the market leader in Visualisers and rapidly became the Visualiser of choice in hundreds of classrooms around the world. Since its inception, the Genee Vision has always focused on high quality static and moving images with its CMOS and CCD lens technology as well as its host of features to complement today's learning environment and changing pedagogies.

The new Genee Vision Wireless adheres to the high quality of the Genee Vision range with added flexibility and manoeuvrability removing the need for cables and giving more classroom options to teachers and students. The new Genee Vision Wireless range is available in two models; Genee Vision Wireless Portable and Genee Vision Wireless Elite. The Genee Vision Wireless Elite allows you to connect up to 60 Visualisers together which can be controlled with our powerful software. This allows the teacher to place a visualiser on each student's desk and instantly share their work to class. The Genee Wireless Elite 200W also has built in audience response system which student can answer question which have been pre-set by the teacher.
